Figure 1. A schematic diagram of the experimental design. The subjects were divided into two groups: the control group and the experimental group. The control group received a standard training program, while the experimental group received a modified training program. The subjects were then tested on a series of tasks, and their performance was compared between the two groups.

1. *Pharmaceutical industry* – The pharmaceutical industry is the largest and most profitable of the health care industries. It is responsible for the development, production, and distribution of pharmaceuticals. The industry is highly regulated and has a long history of innovation. It is a major source of funding for health care research and development.

Handwritten text in a historical script, likely Devanagari, arranged in approximately 10 horizontal lines. The text is written in dark ink on a light background and is enclosed within a rectangular border. The script is highly stylized and appears to be a form of historical or religious text. The lines of text are closely spaced and run horizontally across the page.
